

- Unbeatable low price
- No odours
- No fouling processes
- Long sludge removal interval
- Prevents corrosion in concrete tanks
- Significantly reduced operational costs

AQUATO® STABI-S

Fully biological wastewater treatment for new construction and retrofitting

FOR NEW CONSTRUCTION AND RETROFITTING

The AQUATO® STABI-S is a single-stage activated sludge system according to the SSB® process (sequential stabilizing activated sludge process – an aerobic sequential wastewater cleaning system with integrated sludge stabilization).

The simplest version of the AQUATO® STABI family captivates by its unbeatable price!

It is well suited for your wastewater treatment for new construction or for retrofitting your existing plant.

► Outstanding cleaning performance:

COD: 95%

BOD₅: 99%

SS: 96%

NH₄-N: 98%

N_{tot,anorg}: 77%

► CE certified

► Tested according to EN 12566-3
